RE: Preliminary Eligible Blocks for Connect America Phase II Auction

To Whom It May Concern:

Upon review of the preliminary eligible blocks I determined that there are two blocks, specifically 261450123002056 and 261450124001000 listed as eligible for funding where my company currently provides Broadband Internet service that meets the required 10/1 threshold. The service plans offered in those areas are listed in the table below. Our "Advanced" plan meets both the performance criteria and the price criteria for the blocks to be considered served by an unsubsidized competitor.

Service Plan	Download	Upload	Data(GB)	Latency	Price
Basic	2 Mbps	384 Kbps	Unlimited	< 100ms	\$40/month
5G Family	5 Mbps	1 Mbps	Unlimited	< 100ms	\$50/month
5G Advanced	10 Mbps	1.5 Mbps	Unlimited	< 100ms	\$65/month
5G Power	15 Mbps	2 Mbps	Unlimited	< 100ms	\$75/month

I have reviewed our Form 477 deployment data from the June 2015 Filing, and determined that these census blocks were omitted from the filing due to a mapping error. I have revised the June 2015 and Dec 2015 filing with corrected data.

I kindly request that these two blocks be removed from the list of eligible blocks for CAF funding.

Sincerely,

Christopher Fabien
